

TABLE FEATURES

- ❑ Tilty Twisty and the new Twirly Tables help you access, share, explore, and present data easily and effectively. They enable users to "fly" over and view integrated visual content.
- ❑ A laminated hardwood table top is surfaced with a tough white projection surface and trimmed with hardwood edges for long-lasting durability.
- ❑ The top is attached to the tilting mechanism with a universal joint and is damped with shock absorbing units for a smooth and trouble-free operation.
- ❑ A high lumen, high resolution projector is mounted overhead and projects the computer images onto the surface of the table. The mount can be standalone, or attached to building structure as desired.
- ❑ A Map Browsing System allows the user to collect together a large number of related documents and analyze and present these images collaboratively using tilt and twist zoom.

Technical Specifications

Physical Dimensions

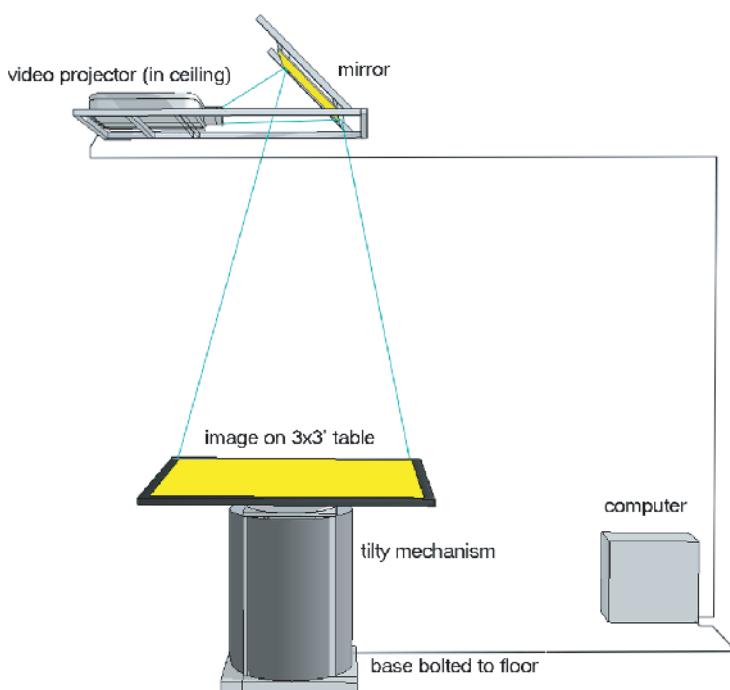

Square Table Top: 42" x 42"
Projection Surface: 40" x 40"
Round Table Top: 42" diameter
Projection Surface: 40" diameter
Height: 31" (nominal)

Computer

Operating System: Windows XP
Processor: dual core 64-bit
Memory: 2 Gbytes
Disk: boot disk plus SATA RAID data disk
Network Connection: Wireless

Projector

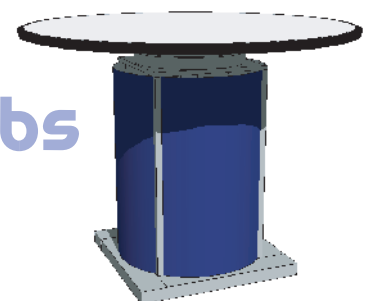

Resolution: SXGA-plus (1050x1400 pixels)
Brightness: 2500 lumens (or better)
Bulb life: 2000 hours (mfg. rating)

Example of acoustic tile ceiling mount design
